GARDEN COUNTY FOUNDATION IS

The philanthropic arm of Garden County Health Services. It was formed in 2004 with the purpose of educating the public about the needs of our county's healthcare facility and to accept gifts on behalf of the Health Services.

Garden County Health Services is unique in that it encompasses five different areas of health care— a critical access hospital, a rural health clinic, emergency services, an assisted living, and a long term care facility. Each of these services offers a level of care that builds a birth to death continuum for residents of the county and surrounding areas.

With such a diversity of health care offerings, their needs are likewise very diverse. Our Foundation's role is to provide opportunities for people to invest their time, money and energy

to make Garden County Health Services the health provider of choice no matter what stage of life.
